INTRODUCTION

Dogecoin (\$DOGE) saw the start of a revolution where projects built on the foundation of 100% community involvement are the untamed wilderness of our future.

Doge Rewards Token (\$DRT) is the leading stable-altcoin rewards token. Earn Binance-Doge (\$DOGE) by holding (\$DRT) in your crypto wallet.

Year 2021 has witnessed how community-based projects are more than just a change of pace, it has challenged the world of traditional finance what the meaning of “the whole is greater than the sum of its parts” really entails in the world of decentralised finance. The Doge Ecosystem supports the importance of tearing down the long-established definition of elitism and success by building a path to freedom and creativity in its place.

With the above in mind. The Doge Rewards Token is our way of recognising the importance of the entire Doge Community. This is achieved by creating a digital ecosystem aimed at creating a multi digital asset platform.

WHAT IS DOGE REWARDS TOKEN

Doge Rewards Token is the world's leading stable-altcoin rewards token, distributing consistent dividend income to our holders via our innovative passive income system known as (*DOGE X2*). We aim to disrupt and revolutionize the concept of stable-coin dividend paying tokens. This is achieved by selecting a stable altcoin from among thousands, which has long -term capital appreciation and stability, as the source of dividend (*Passive Income*).

The selection undergoes a very rigorous process using proprietary back-testing, hypothesis testing and forecasting techniques coupled by intensive community-based research by our Venture Capital Partners: (*DOGE*) emerged as the choice of this natural selection. Our project is overseen by an experienced team of developers, designers and marketing specialists. Our primary goal is to make Doge Rewards Token a Top-20 crypto project.

DOGE X 2 (ACTIVE AND PASSIVE)

Double the growth by receiving consistent dividend pay-outs in Binance-Doge (\$DOGE) as *passive* income 24 hours a day by simply holding Doge Rewards Token (\$DRT), an *active* potential *100X* and leading stable-altcoin rewards token that embraces, the same ethos and objective of the DOGE Ecosystem: *Achieving economic freedom for the masses with digital assets in a fun manner with strong community backing.*

WHY PASSIVE INCOME

*It's about the power of passive income. * Out of the many types of *passive income* strategies, *dividend income* is arguably the best form. Dividend tokens pay holders a regular reward without additional investments, even in bear markets and crypto winter despite market volatility. Dividends will form the basis of a *stable and consistent* returns in any investment portfolio.

WHY DOGE AS DIVIDENDS PAYOUTS

The demise of TerraUSD (UST) on 7th May 2022 has exposed the vulnerability of Algo Stable Coins and the reliability of its algorithms in maintaining the peg to the US Dollars. Likewise, between 2017 to 2022, Tether (USDT) has de-pegged on 12 different occasions (citation) ranging from a low of \$0.18 to a high of \$10*.

It is within such a context, the choice of the Token for Dividend pay-out must be one, that is not reliant on algorithms but rather on the social and legitimate acceptance of the masses, endorsing it as an alternative Stable Coin. And DOGE emerged as the clear winner.

Social Acceptance the OG of meme coins: The success of Dogecoin since its launch in 2013 has inspired the growth of many other memecoins, which have developed into their own entire sector of playful digital assets that prove the market value of internet culture in the digital economy.

Though forged from popular internet culture, DOGE continues to maintain a reflexive relationship with social media influence. For example: In April 2019, Elon Musk said on Twitter that Dogecoin “might be my fav cryptocurrency. It’s pretty cool.” Many people believe this statement caused the cryptocurrency’s price to significantly increase. Similarly, between May 2020 and July 2020, the price of Dogecoin rose by almost 200% (from \$.001571 to \$.004398) after widespread publication of Dogecoin-related content from Dogecoin holders on the social media platform TikTok. In February 2021, billionaire investor Mark Cuban stated that he purchased some DOGE cryptocurrency for his young son in order to

teach him crypto and investing principles in a fun, accessible manner.

While Dogecoin (DOGE) began as a parody of cryptocurrencies, it has earned a significant market capitalization of over \$11 Billion and widespread attention with over 4.4 million holders. Importantly, the DOGE crypto network continues to serve as a popular onramp for new investors entering the wide world of cryptocurrency, and its leading role in popularizing memecoins has helped develop a marketplace for assets driven by and for internet culture. While the project may have been launched in jest, what it proves about the value of memes is a formidable proposition for the emerging digital economy.

Legitimate Acceptance: DOGE has been adopted as a form of legitimate payment method at hundreds of stores and retailers worldwide. And it's not only small e-commerce stores either. Here are only some of the companies and organizations you may have heard of that accept DOGE as payments. GameStop, AirBaltic, AMC, American Cancer Society, CDKeys.com, Dallas Mavericks, Twitch, Newegg, Private Internet Access, Save the Children, Tesla.

Takayuki-San creator of the Doge Rewards Token Community said “we believe through the power of collective decentralization we can build something stronger than a centralized team ever could create. A community-run token is nothing without the united individuals who give it purpose.”

WHY BSC

Why BSC is the most logical launch strategy.

Several factors made us choose to develop and to build on BSC. One of the reasons is that the chain is promising and has many legit resources to back it up. Changpeng Zhao (CZ), the creator of Binance, BSC, and BNB has personally stated that they will be pouring many resources to get developers over to Binance Smart Chain.

Additionally, the ridiculous gas fees currently plaguing Ethereum renders the chain useless for ordinary retail investors. Besides, BSC's transaction fee costs a few cents every few seconds. The block time is also much shorter. On Ethereum, the block-time is 30 seconds, while on BSC, it is 3 seconds. That is ten times faster. A considerable amount, especially if you want to use Defi applications in real-time.

Furthermore, BSC solves expensive smart contract interactions by significantly lowering transactions fees given Doge Rewards Token's unique tokenomics of rewarding \$DRT holders 7% Binance-Pegged DOGE. Therefore, as BSC offers the best initial market (a completely unserved one) and the most pragmatic use case in the actual application, we think this is the most logical launch. Post-launch, due to DOGE's architecture, we will be working with the community to port onto new chains.

TOKEN DISTRIBUTION

Total Supply of Doge Rewards Token (\$DRT): 100 billion

TOKENOMICS

The word “tokenomics” (token + economics) describes a crypto token’s supply and demand characteristics, tax structure, fees and rewards. Doge Rewards Token was the first major token to offer passive stable-altcoin income via its innovative token distribution strategy and advanced tokenomics. With each transaction (Buy, Sell or Transfer) a 15% transaction fee is applied which is automatically distributed in the following way:

7%

Dividend Fees

7% is sent to \$DRT holders in \$DOGE stable altcoin (minimum of 5,000,000 tokens)

How Doge Dividend Rewards work

When you hold a minimum of 5 million Doge Rewards Token (\$DRT) in your crypto wallet the system recognizes this and will send you a specific amount of **Binance-Doge (\$DOGE)** that is dependent on the amount of Doge Rewards Token (\$DRT) you hold and the overall trading volume of the token. The more Doge Rewards Token (\$DRT) you have and the more trading that there is, the more **Binance-Doge (\$DOGE)** you will receive.

4%

Liquidity Pool

4% of every transaction is transferred into the Liquidity Pool to create a stable price floor

The Doge Rewards Token Liquidity Pool

The Doge Rewards Token Liquidity Pool works as a function of the 4% fee collected from transactions. The system sends Doge Rewards Token and BNB into a locked and certified liquidity pool to stabilize the price and make sure that traders can always buy and sell at any time and whenever they want to.

***Additionally, 4% of every transaction is sent to our Development Fund for marketing, utility development, exchange and staffing costs.**

ROADMAP

H2 2022

- Define scope (stable vs alt coins)
- Define project name (Birth of Doge Rewards Token, SDRT)
- Stress testing of major algo stable vs alt coins
- Website development phase 1
- Aggressive pre-sale marketing campaigns

H2 2023

- Listing and trending on major crypto voting website
- Launch dividend and staking rewards
- Aggressive marketing campaigns by influencers from Instagram and YouTube
- Coin Market Cap/CoinGecko listing
- First 50,000 holders

H1 2023

- Private Pre-Sale
- Launch liquidity on pancakeswap
- Website development phase 2
- API integration into Trust and Coinbase wallets
- Launch DRT on multi chain
- Launch NFTs
- First 10,000 holders

H1 2024

- Launch proprietary DEX (DRTswap) and launchpad on multi-chain
- Launch of multi bridge DRT wallet
- Launch of the complete DRT ecosystem
- Listing of other projects on DRT launchpad
- Listing on at least 2 CEX
- More than 100,000 holders

THE END
